LOGIC GERM

What kind of product is Logic Germ and what is it used for?

LogicGerm is an alcoholic reduced antiseptic for the disinfection of surfaces. Think of hard surfaces: bathtubs, showers, tiles, toilets, sinks, bed bases, oors, table tops, door handles, surface of the doors and tools. Disinfection of surfaces, floors and other objects. Leaves an active protection layer in the pores. Effect against bacteria for up to three months.

The advantage of LogicGerm is a low alcohol percentage, reduced re risk, as well as the considerably longer duration (up to three months). Surfaces and substances that have been cleaned with normal alcohol disinfection can be germinated immediately (infected). In contrast, LogicGerm leaves behind a very thin active layer, creating a protection with a duration of several days to months, even when the layer has been deducted over time.

HOW TO USE OUR ANIMAL DISINFECTANT LOGICSEPT + Animal?

1. Before using Logic Sept+ the surface should be cleaned. Remove bedding, food and water containers.
2. Remove all organic material (feces, urine, blood, respiratory secretions and dirt). You can use soap or a general cleaner, rinse, and dry.
3. Apply the diluted product throughout the whole space. You can also use our ULV machine, it works perfectly with our Logic Sept +. Surfaces should remain wet with disinfectant for a minimum of 10 minutes and then be allowed to dry. Because our product doesn't harm the environment or animals, you don't have to rinse it.

Plants Plant MoldEX+

What kind of product is Plant MoldEx+ and what is it used for?

Moldex Plant is a fully organic product. Bacteria in trees, flowers and all other plant varieties cause plant tissue, fading of leaves, drying out of roots, stopping development and producing harmful oxygen. The product protects the plant's tissue by destroying the bacteria on the plants, adds vitality to the leaves and accelerates their development by making the roots more resistant. It allows the plant to grow better and faster.

MoldEx plant can be added to the water in which the plants grow. MoldEx is bio-based and contains no harmful substances. This makes it possible to achieve the optimum growth of plant species .

HYDROPONICS WORKING METHOD

- . The plant is placed in a type of substrate that consists of porous rocks, rockwool or materials that cannot rot.
- . The water is somewhere in a reserve system and the capillary action brings the water to the roots in the porous media.
- . This makes it even possible to grow plants that have different water needs next to each other. the plants will grow depending on the availability of water.

MOLDEX PLANT EN HYDROPONICS

- . Moldex plant can be added to the water in which the plants grow
- . Moldex is bio-based and contains no harmful substances
- . This makes it possible to achieve the optimum growth of plant species

Disinfectant machines

No-Touch Hand Sanitizer Machine

Our No Touch Hand Sanitizer machine is an innovative machine that disinfects your hands quickly and easily. At the same time there is the possibility to disinfect your belongings such as keys, telephones, wallets, in the designated compartment in the machine. Built-in screen with remote control on which you can play the desired videos. The No Touch Hand Sanitizer machine can also be supplied with a temperature gauge to easily measure the temperature of each user. A 5 liter jerry can filled with disinfectant goes into the disinfection machine.

A disinfecting machine can be more than just disinfecting, but it can also provide features such as:

- Disinfect personal items
- Be an advertising platform
- Be controlled from a distance simply by phone And many more!

QR code Scanner

Our applications

application 1

The Team of Logic Develop made an application to control the NO-TOUCH Hand Sanitizer Machine from a distance and to monitor its use. The application manages two categories:

1. Controle the machine from a distance

- Your own user profile for your machine;
- Let the machines start up and shut down automatically when you want;
- Have the desired photos and videos played on the machine at the desired time;
- Get a notification when the disinfection canis empty;
- Get a notification when the machine is not working or have any malfunction;
- Get a notification when the machine is removed from place.

2. Playing advertisements of your company on the screen(s) of the machine

Our machines are located in various busy places. This allows many people to see the machines and see what is playing on the screen. It is possible to buy advertising time from us so that your marketing photos and videos are played on the machines. This means that it is not necessary to be the owner of the machine and you can use the marketing options that the machine has.

application 2

QR/HES code application

This application is developed so that people can easily register themselves in the app. After they are registered, the application displays a unique QR/HES code that is linked to one person. After this code is scanned, the application provides insight into the following three categories:

1. Your customers' contact details

This way you know who has registered as a visitor and you can easily contact them in case of infections;

2. Negative or Positive Test Results When the QR/HES code has been scanned, the machine will glow a green light if the test is negative. If the test is positive, the machine will display a red light.

3. Vaccination Certificate

The application shows you at a glance whether your client is vaccinated or not.

This may be a requirement at events or government gatherings.
