Hand Sanitizer Model 1:

This machine is easy to install and takes up little space. At the same time, it is a real eyecatcher model for disinfecting your hands. The machine has been developed with meeting the prevailing hygiene standards and is easy to use by everyone. Have your customers' hands disinfected and market your business at the same time!

- ① Basic (no-touch disinfection compartment, personal design, 5 liter jerrycan capacity)
- ② Lights
- ③ QR-code scanner
- ④ Temperature meter
- ⑤ Touch screen
- ⑥ In any color
- ⑦ With your chosen design

***Each machine has additional options that can be included. This way, each machine can be personalized to your liking.**

Hand Sanitizer Model 2:

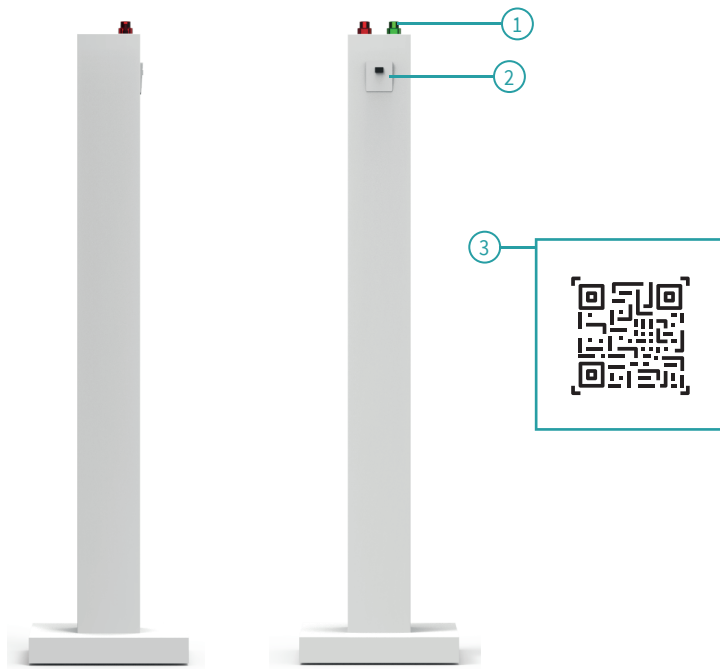

This no-touch machine makes it possible to disinfect your hands and personal belongings quickly and safely. The disinfection process is done with a sensor or ultraviolet radiation. The screen(s) make it possible to present your company in the best way. The machine is composed in such a way that it is easy to use for young and old. In addition, the machines are produced with a view to sustainability.

- ① Basic (1 screen, no-touch disinfection compartment, personal design, 5 liter jerrycan capacity)
- ②A Per extra screen
- ②B Per extra screen
- ③ QR-code scanner
- ④ disinfection pump
20 liter jerrycan capacity
- ⑤ Temperature meter
- ⑥ UV-compartment
- ⑦ Application use for Advertising
(movie, image)
- ⑧ In any color
- ⑨ With your chosen design

***Each machine has additional options that can be included. This way, each machine can be personalized to your liking.**

QR/HES-code reader Machine

- ① Lights
- ② camera
- ③ QR-code scanner application
- ④ In any color
- ⑤ With your chosen design

**Each machine has additional options that can be included. This way, each machine can be personalized to your liking.*

This model makes it possible to scan codes. By placing the machine at the entrance, each customer can register themselves by scanning their code. In this way there is no need for personnel to manually scan the codes per person. The machine is designed with the latest technology to suit your needs.

Our applications

application 1

The Team of Logic Develop made an application to control the NO-TOUCH Hand Sanitizer Machine from a distance and to monitor its use. The application manages two categories:

1. Control the machine from a distance

- Your own user profile for your machine;
- Let the machines start up and shut down automatically when you want;
- Have the desired photos and videos played on the machine at the desired time;
- Get a notification when the disinfection canis empty;
- Get a notification when the machine is not working or have any malfunction;
- Get a notification when the machine is removed from place.

2. Playing advertisements of your company on the screen(s) of the machine

Our machines are located in various busy places. This allows many people to see the machines and see what is playing on the screen. It is possible to buy advertising time from us so that your marketing photos and videos are played on the machines. This means that it is not necessary to be the owner of the machine and you can use the marketing options that the machine has.

application 2

QR/HES-code application

This application makes it quick and easy for your customers to scan their QR/HES-code. The application gives you insight into the number of people scanning his or her codes and the time of day. This way you can monitor your customers and the peak hours of your company.
