

Disinfection

Hand sanitizer machine

About us

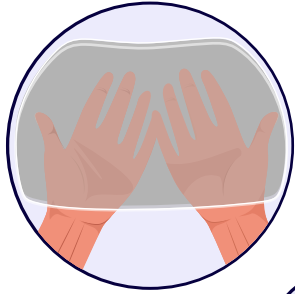

The current era underscores the inadequacy of existing hygiene standards, emphasizing the need for reliable and appropriate tools for thorough disinfection. Hence, we've developed solutions that guarantee dependable and precise protection, ensuring you no longer need to compromise in your daily life.

Numerous drawbacks surround alcohol-based disinfectants. They offer short-term efficacy and can pose health risks, ranging from minor skin irritations to severe organic damage. Recognizing these concerns, we've crafted a sustainable and innovative disinfectant free from alcohol. Logic Sept+ stands out as ideal for all skin types and ages. Its effectiveness ensures swift hand disinfection, providing all-day protection effortlessly. With Logic Sept+ , enjoy carefree and comprehensive protection-an assurance only our product can deliver.

Our certificates

While manual (push) machines consume 5 liters of disinfectant on average **500 people, the Hand Disinfectant Device performs an average of 3,500 people** from 5 liters of disinfectant.
